Keywords: XXst century, spiritual, intellectual, moral, educational, higher education, socio-economic, educational science, competitive, Uzbek folk pedagogy.

The task of the upbringing of the XXI century is high mine. It is such education that the role of higher education in improving the spiritual and moral education of student youth in the education of their independent spirituality, in the study of the main aspects of their historical and cultural property is considered incomparable and important. In this, higher education is one of the most urgent issues in the student youth to develop interactive technologies for ensuring the socio-economic and cultural development of our republic, which are aimed primarily at developing a highly qualified competitive cadre for independent work in their chosen specialties and instilling in the minds and hearts of students the idea inherent in national values. In order to carry out such tasks, the study of the technology of teaching education in the direction of primary education of higher education was introduced, the original purpose of which was the future Faculty of primary educationI.

Methods of spiritual education:

1. Methods affecting student consciousness:
2. Manavio-ethical topic conversations:
3. Narrative method.
4. Report and workshop work with media in classes.
5. Debating
6. Explanation
7. Sample display
8. Organization of meetings
9. Press conference
10. Contests
11. Stage classes
12. Work with educational and auxiliary literature
13. Consciousness of spiritual and moral education multimedia educational technologies

Pedagogy of primary education consists in the fact that conducting conversations on a spiritual and moral topic in classes forms the culture of treatment of students a sense of patriotism. The method of persuasion training in the organization of lectures and seminar lessons is one of the main techniques in the formation of the spiritual and moral worldview of students. In the method of persuasion, by the way the teacher affects the students in their studies, in their spirit, in their orientations, in their will forms their moral intellectual and other positive qualities in harater, keeps vices from negative ones.

Persuasion is a method that deeply relies on the person being formed, based on universal values, National udum and traditions, philosophical worldview, and the true essence of our national independence

ideology.

Through the "Devat" method, students are taught to independently think, learn the opinion of students who have educational significance in the window of ingenuity and erudition-mind, about the nature of books and books and books on the mind's view of spiritual and moral education of allomas, about the profession and profession, about the cooperation-development factor, and independently think, along with Since the study of national-spiritual values forms the fundamental basis of pedagogical science, a strong emphasis is placed on the formation of knowledge on this topic in lessons in the field of Higher Education
