

THE IMPACT OF THE SHADOW ECONOMY ON THE ECONOMY OF THE REPUBLIC OF UZBEKISTAN

Raximova L.A.

Asian international university

Abstract: This thesis presents information about the concept of the shadow economy, the role of the shadow economy in our country, and the harm it causes. In addition, it also discusses research on the shadow economy conducted in foreign countries.

Keywords: hidden economy, hidden processes, non-economic methods, hidden economic turnover, offshore zones.

Hidden economy openly noticed impossible goods and services working production , distribution , exchange , consumption processes – economic relationship is , its basically some people or people group interests lies . Hidden economy of the world almost everyone in countries available . Hidden economy , secret economy - participants by open done inexhaustible , state and society by control taxes that are not paid

unpaid , official state in statistics record immature economic processes and

farm activity types . Hidden economy - open imperceptible goods and services

working issue , distribution , exchange and consumption to do processes - known one people or people groups in the interests of based economic relationship .

Hidden economy of the world almost all in countries there is .

Confidential economy – participants by openly take inaccessible , state and society by control taxes that are not paid unpaid , official state in statistics record unattainable economic processes , economic activity are types .

Hidden economy – complicated many step by step event is , its various kind form and types there are :

1. Criminal economic activity . This absolutely forbidden made , law way with persecution attainable affairs with to engage , that is drug trafficking , weapons business and etc.
2. Illegal , uneconomic methods with income again distributing by mastering to get , that is theft , robbery , racketeering , bribery .
3. Secondary economy – to people damage they do not bring for profit without wanted , but officially permission immature and state from the list not passed economic activity . To them hidden entrepreneurship , 1-2 and 5-10 people employed hidden small enterprises activity enters . Hidden entrepreneurship service display , construction , trade , clothing working in the release wide spread .

4. Officially permission done activity with together additional accordingly hidden working to release hand hit , open working in enterprises additional accordingly account to not entered product take it out hidden

5. Career abuse to do and to corruption based economic behavior layers . These are to the sentence state in the offices bribery , covert lobbying , career from using subsidies to take input

6. Counterfeit economic activity is economy state to the sector typical to be the state to deceive This is the most obvious sample state sector in adding writings , not done affairs for from the state right to take and this kind of are works .

Secret economy scale hidden economic turnover , that is permission maturity gan goods and services create and them sell size with is determined . Circulation secretly since it was his/her clear calculation It won't happen . instead of him/her approximately assessment method is applied . Some to the calculations according to , past century at the end land on the face hidden economic turnover of 8 trillion dollars or world gross 27.5% of its output equal was . However hidden economy scale yes various in countries differs . Hidden economy the most developed matter to the floors Latin America and Africa countries . Egypt in 1999 and In Nigeria hidden economy gross internal 70% of the product equal It was . Hidden economy contribution the most less was country In Asia Japan (1–2%), Cave bi In Europe Switzerland is considered . In the CIS countries hidden economy alien level average . The world developed in countries such as the USA and In Italy hidden of the economy gross internal in the product contribution respectively 6 ,4 and 11.4 % organization (1997). By the 21st century of the economy globalization axis in the west hidden economy national from the circle out , international to the level rose . Yas snoring economy globalization this one in the country hidden economy other to the country in the transfer , adverse business works with practitioner international companies appearance in being

It seems . example as international drug business , youth snoring weapon trade , worker of strength hidden migration to organize , offshore zones through illegal roads with found to get money " legally " like show possible . These international to the community big risk The money edge to the country hidden to take out and " clean " against struggle for the purposes of ring yes community special organization – International financial actions group organization reached (36 countries) member ; 2000). Hidden the economy only negative sides not , on the contrary his/her to society causing improve the benefits having studied our exit priority is our duty . Hidden economy with practitioner to individuals following roads with to them opportunity giving , own entrepreneurship openly done increase possible seeing we will go out :

1. Secret economy with practitioner to individuals how much term Eve to you taxes reduce or from taxes free to grow through , later term since it ended then and from them tax get . Current on the day hidden economy is also international to the level has risen . Because of this they also have turnover income increased the league guess let's do possible . Estimate let's do reason and participants eye from what openly take inaccessibility , state and society by control not to be done stop . Turn around income many that was because of they paying tax is the same appropriate many will be if they own entrepreneurship openly done

2. If the products they produce benefit the state and people, help and support them to further develop their entrepreneurship by providing them with benefits and loans.
3. By reducing excessive paperwork.
4. By reducing fines .
