

ISSUES OF ENHANCING THE SPIRITUALITY OF YOUTH IN THE PROCESS OF  
GLOBALISATION*Eshmuratov Ajiniyaz Allamuratovich**Berdak named after Karakalpakstan State University**Art history department intern teacher**Ismailova Jumagul Farhad kizi**Culture and art institutions organization to grow and management direction Stage 2 student*

**Abstract :** Current globalization in the process of the youth education always follow the procedures alike control can to take difficult work that to all of us known , as well their high spiritual and perfect human become their growth for all of us We are responsible . Time intensity with developing one at the time tomorrow our day owners was of the youth high spiritual so that they time requirements worthy in a way own to the mind capable , creative thinker individuals as formations for enough at the level opportunities creating we give This is necessary . young people in the article education – upbringing and spirituality increase issues about illuminating gives . Because, high spiritual , knowledgeable and society overcome It won't be possible .

**Key words ;** education , spirituality , globalization , youth , specialist , law , goal , time , educators , society .

Humanity development development in the phase since ancient times spirituality field as a pressing issue separately attention looking at At the same time , tradition human identity meaningful unique miraculous power - to power has . Spirituality so powerful is a force that can be used in any people and the nation great and glorious to unite towards goals invitation It will be high . spirituality , good quality education and manners side by side – any one as long as they are side by side in society development will be . With this together current at the time our country all in the fields reforms done increase , people worldview change , mature and time on demand answer giving expert personnel to prepare period demand become Our main our goal human interests up lift , rights and freedoms , law priority in guarantee our country all citizens for law in front of equality provided citizenship society Independence from the years after in our country to the eye visible changes it has been .

First Our President IAKarimov « Our head strategic our goal strict and unchanging market to the economy based free and democratic state build citizenship society solid the foundation from forming consists of " emphasized were . Free and free our homeland promising plans based on future yellow speed step throw for to us healthy , science science to the development contribution additive society need . Every one in the field high perspective achieve for we again Abu Basil Beruni , Ibn Sino , Ibrat , Munavvar Old Abdurashidkhanov and Abdullah Like Avlonius individuals again again discovery we can need . Such perfect generation in cultivation neighborhood , family , community organizations and education institutions separately place occupies .

Future generation about care , healthy , harmonious generation adult to deliver aspiration to our people typical national is one of the characteristics . In the family healthy environment there is as long as they have everything healthy , well-rounded human is formed . Youth upbringing in particular physically energetic , intelligent healthy , universal culture level high , modern

knowledge and to the profession has was future generation adult in delivery family spirituality caught place is separate . Perfect generation upbringing of the youth spirituality , thinking formation is the basis of Uzbekistan . youth In this respect take our state future , nation development today's of the youth knowledge , enthusiasm , worldview , patriotism of feeling how much to the height , perfection to the level depends .

Youth spirituality increase , his/her worldview , knowledge and enriching his morals as well goes . Youth spirituality up take from the exit main our goal , them mother Homeland in front of duty , own fate for responsible being , neighborhood, work team , family and close people life for responsibility feeling from upbringing consists of . But technique development during young we are , information today's on the day human heart and mind different in directions impact conductor powerful tool the most strong to the gun Because , " Whoever to information has to the world ownership " will do , " he said. idea today's on the day all from the side confession Especially the world on a scale information exchange increase the youth always information flow under the influence to be take is coming . Today internet during the day and social in networks human heart and to the mind negative impact indicative websites from 10 thousand , immorality and lewdness promote to do aimed at websites from 50 thousand increase with manifestation is happening .

Modern information The action on the field is so much tight , that 's all quickly , now as before , this event from us very far away face gave , his to us connection no , carelessly looking at It 's no secret that sometimes carefree to be seemed music , simply cartoon or advertisement plate also known as one ideological – ideological goals and aspirations is expressed . This in mind caught without information technologies development as a result of internet networks being distributed data , " public" "culture" different kind from the looks to protect aimed at rules system create , in which state and non-governmental organizations tasks clear by designating to put necessity There is such a thing . in the situation youth mind negative from ideas protection to do aimed at law project , « Information safety doctrine or strategy working exit , education in institutions take to ongoing ICT training from the internet profit culture and information to safety aimed at topics to teach improvement necessary in youth information culture to form , modern from technologies right to use encourages . This for , society heart was family education upbringing place is national idea and spirituality youth consciousness and to the heart to absorb exactly in the family it gets even easier .

Education from upbringing , upbringing and from education separate it won't be possible and this process high spiritual requires being . More than ever according to more internal and external of beauty morality with to the merger importance has increased . To the youth homeland freedom and independence on the way soul sacrifice did our compatriots shown patriotism and heroism , in them loyalty , dedication , perseverance and courage such as qualities , as well as country, family , parents and children protection people and ancestors memory in front of holy duties that there is youth to the mind instilling , in the youth , around us and in the world event giving political-social to processes national in our interests come came out without approach skills , public information tools , that's it including the Internet world information network through being distributed malicious information , etiquette corrosive vices , youth to the point of error leader spoiler to ideas against healthy worldview formation The youth public information from the means in use manners in the standards action did without to use to teach and in them own on top of work and free thinker person become in their maturity help we give need .

The youth upbringing and their personality in every way mature to give all general education schools on behalf of These tasks are in students all ability growth , creative aspiration to the body to bring main factor become is considered . Advanced ideas in our time event giving changes , as well as historical topics modern in spirit explanation son and in girls ideological faith spiritual worldview upbringing A rich source for become is considered . Only then young generation emotional impact indicating in them courage , bravery , initiative nurturing solid national upbringing system content finds .

Education upbringing processes up lift for before emphasizing as we pass general education in institutions there is problems eliminate we can also , students future to life preparation and to them own knowledge and from skills in practice use instructor qualification requirements classes in the section working exit , interdisciplinary mutual connection and classes in the section periodicity complete compliance did without training programs between unity ensuring that students' knowledge of science occupied knowledge with one in line literacy , competence and personal adjectives assessment and to professions was interest determination system current to grow such as work done increase necessary .

In Turonzamin from time immemorial human spiritual maturity , moral qualities upbringing our ancestors attention in the center to be that came of the youth to the mind to absorb achieve necessary . In youth exactly social to relationships to enter for necessary was spiritual and moral categories , norms , values system about knowledge harvest to do and from them practical in activity use skills improvement important place It holds . In this position teachable to education related in sciences social consciousness formation methods ( conversation , debate , problem-solving) (education ) productive use to the goal In accordance with . In youth high spirituality to be strong society to create big help gives . Because, spirituality high was society gold overcome It won't be possible .
